PROJECTS

Responsive React single page C2C website
www.lulusmart.com
Developed a webapp platform to promote self-employed service provider's business. Mainly responsible for the front-end development and technical feasibility of UI/UX designs using React JS and SCSS. Working with development team and managers for keeping site up-to-date and prioritizing needs, among other tasks.

React native mobile app
LuluSmart
Developed the mobile application based on the website that helps self-employed service providers to easily manage appointments and communicate with clients, successfully increased providers' sales by 30%. Responsible for front-end development and UI / UX design.

React native mobile app
LuluCheck
Developed a cross-platform client-side application for all property owners to check and document the conditions of their properties while away. Remain the same front-end duties while having more opportunities to work as a full-stack developer. Engineered dynamic components and created reusable code to facilitate future use.

React Github portfolio page
www.wenweicui.github.io
A simple single page application Portfolio website with React JS. Use it to showcase works, testimonials and other information to others.

React native mobile app
github.com/wenweicui/react-native-fifteen-puzzle
Developed a React Native mobile game application for the Fifteen puzzle game using the React Native Game Engine Handbook library. Enabled the function for user to connect the game with Game Centre account to see the scoreboard ranking.
